Paediatric Bereavement and Palliative Photography Service

Building healthier lives

UHB is a no smoking Trust

A guide for families

Palliative Photography Service:

At the University Hospitals Birmingham NHS Foundation Trust, we offer a free palliative and bereavement photography service. This service may be of help to you as photographs can provide you and your family with memories lost during this time of grief.

If you wish to use this service:

We can arrange to photograph your child at rest.

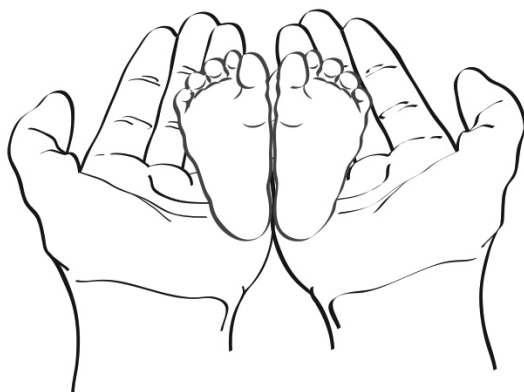

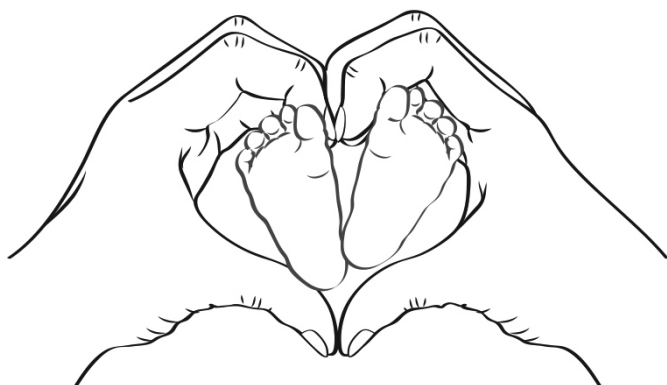

During this time we can capture photographs of your child's hands, facial details such as eyelashes, their feet or include special props such as a teddy bear or a wedding band.

You are able to be present throughout the photography if you wish. We can also photograph you and your child or relative together, or include other family members in the photographs.

Suggested views

Please see examples of suggested views. If you would like something that is not shown here, please talk to a member of the nursing staff or the photographer.

Printed photographs

The photographs will be printed in black and white, which will be presented in a photo mount box. You will also receive digital copies of all the individual images on a USB stick.

Further information

Feedback:

Your feedback is important to us. If you would like to give us any feedback or need any further information please contact:
