

Information About Your Gallium-68 DOTATOC PET Scan

Contact Information

Phone: 0121 371 7220 **Email:** birminghampet@uhb.nhs.uk

Opening hours: Monday to Friday, 7am to 7:30pm (some Saturday appointments are available)

Please read the following information carefully as it contains important information about your scan.

What is a DOTATOC PET-CT Scan?

- **PET** is short for Positron Emission Tomography.
- This is a Nuclear Medicine technique that uses a radioactive injection to look at different parts of the body.
- A **Gallium-68 DOTATOC PET scan** involves an injection into a vein of a radioactive substance called DOTATOC into a vein.
- The scan combines PET and CT (Computed Tomography) to detect areas where DOTATOC is concentrated in the body.

Is it safe?

- The scan uses a small amount of radiation, and the risk to you is low.
- The benefits of the scan outweigh the small risk.
- A medical professional has reviewed your case to ensure the scan is safe and appropriate for you.
- If you have any concerns at all, please contact the department.

For All Patients Aged Between 11-55

- If you know that you are pregnant, or there is a chance that you may be pregnant, please contact us as soon as possible.
- Please also contact the department if you are breast feeding or chest feeding, as we may need to give you special instructions.
- In line with national guidance from the Society of Radiographers, inclusive practice or behaving in a way that makes all people or groups of people feel included and valued is integral to effective healthcare.
- If you are aged between 11 and 55, you will be asked to sign a form asking questions about any potential pregnancy and your registered sex at birth.

-
- This is to ensure safe testing and accurate diagnosis when reviewing your images as we will need to be aware of any potential variations in your anatomy.
 - This information will be stored sensitively and confidentially.
 - If you require any further information about any of this or if you have any questions, please contact the department.

Preparing for Your Scan

- Please drink plenty of water, you will be able to go to the toilet as usual.
- You should wear comfortable clothing with no metallic fastenings/zips, no metallic decoration or jewellery.
- You are welcome to bring an audiobook to listen to as you will be unable to read whilst in the preparation room.
- Please **take all medication as normal**.

Attending Your Scan

- **It is important to be on time for your appointment.** The radioactive DOTATOC is ordered as a timed delivery especially for you as it can only be used for a short period of time, so please do not be late for your appointment as you may not be able to have your scan that day.
- **If you are unable to attend or are going to be delayed, please telephone us at the earliest opportunity.**
- Please **DO NOT** bring children or anyone who is/may be pregnant with you to your appointment. Please only bring a relative, friend or carer with you if it is essential to do so. They will have to remain in the waiting room during your appointment.
- If you are travelling via hospital transport, please contact the department to adjust the time of your appointment. Please contact your referring doctor if you require hospital transport.
- It is helpful for our staff to have a brief history of recent medical procedures and a list of the medications that you are taking at the time of your appointment.

Please Note: The DOTATOC is produced for your appointment by a complex process. On rare occasions, this process can fail as a result of a production problem. If this happens, we may be unable to perform your scan and have to cancel your appointment at short notice. We will inform you as soon as possible to arrange a new appointment.

During Your Scan

- You'll be taken to an injection room for a brief medical history, and we will explain the procedure to you.
- A small cannula will be inserted into a vein and the **DOTATOC** will be **injected**.
- You will then **rest quietly** for about **1 hour** while the injection is absorbed by your body.

-
- You will then be asked to go to the toilet to **empty your bladder** before the scan.
 - You will then be asked to lie flat on the scanning bed and will be required to keep as still as possible, but you can breathe as normal. If you think you may struggle to do this, please speak to us before your appointment.
 - The scan will take **30-45 minutes**. A member of staff will be able to see and hear you throughout but will not be in the same room as you.
 - Please expect to be in the department for **2-3 hours**.

After the Scan

- The radioactivity in your body will soon disappear if you continue to drink plenty of liquids. These will help to clear the radioactivity from your body more quickly. It is very unlikely that you feel any side-effects after the scan, but if you do please let staff in the department know.
- Once we have checked your images, you can leave the department.
- This scan does not affect your ability to drive.
- After your scan there will be some radioactivity left in your body, but this will not present a significant risk to other people around you. However, once you have had your scan and then left the department, for **4 hours afterwards**, try to keep any time that you spend within one metre of pregnant people, babies and children as short as possible.

Your Results

- A specialist will interpret the scan and send a written report to your consultant within 7 working days.
- Please inform the department if you have an appointment with your consultant earlier than 7 days after the scan.

Information About You

- As part of your care, information will be shared, only where necessary with clinical staff. Information may be used to help train other staff, or to improve our quality of care. It will all be treated as confidential, and your details will be removed where possible.

Translation and Interpretation Service

- If you require this information in another format, such as a different language, large print, braille or audio version, please ask a member of staff or email: interpreting.service@uhb.nhs.uk
- Should you require an interpreter, please contact the department prior to your appointment so that we can arrange this.
- If you do not wish to use the hospital's interpreting service, it is possible for a member of your family or a friend to translate for you, but this must be done in accordance with hospital policy and your friends/family member will need to sign a disclaimer.

Teaching, Training and Research

- Our Trust is committed to teaching, training and research to support the development of health and healthcare in our community. Healthcare students may observe procedures for this purpose, but only with your consent.

Patient Advice and Liaison Service (PALS)

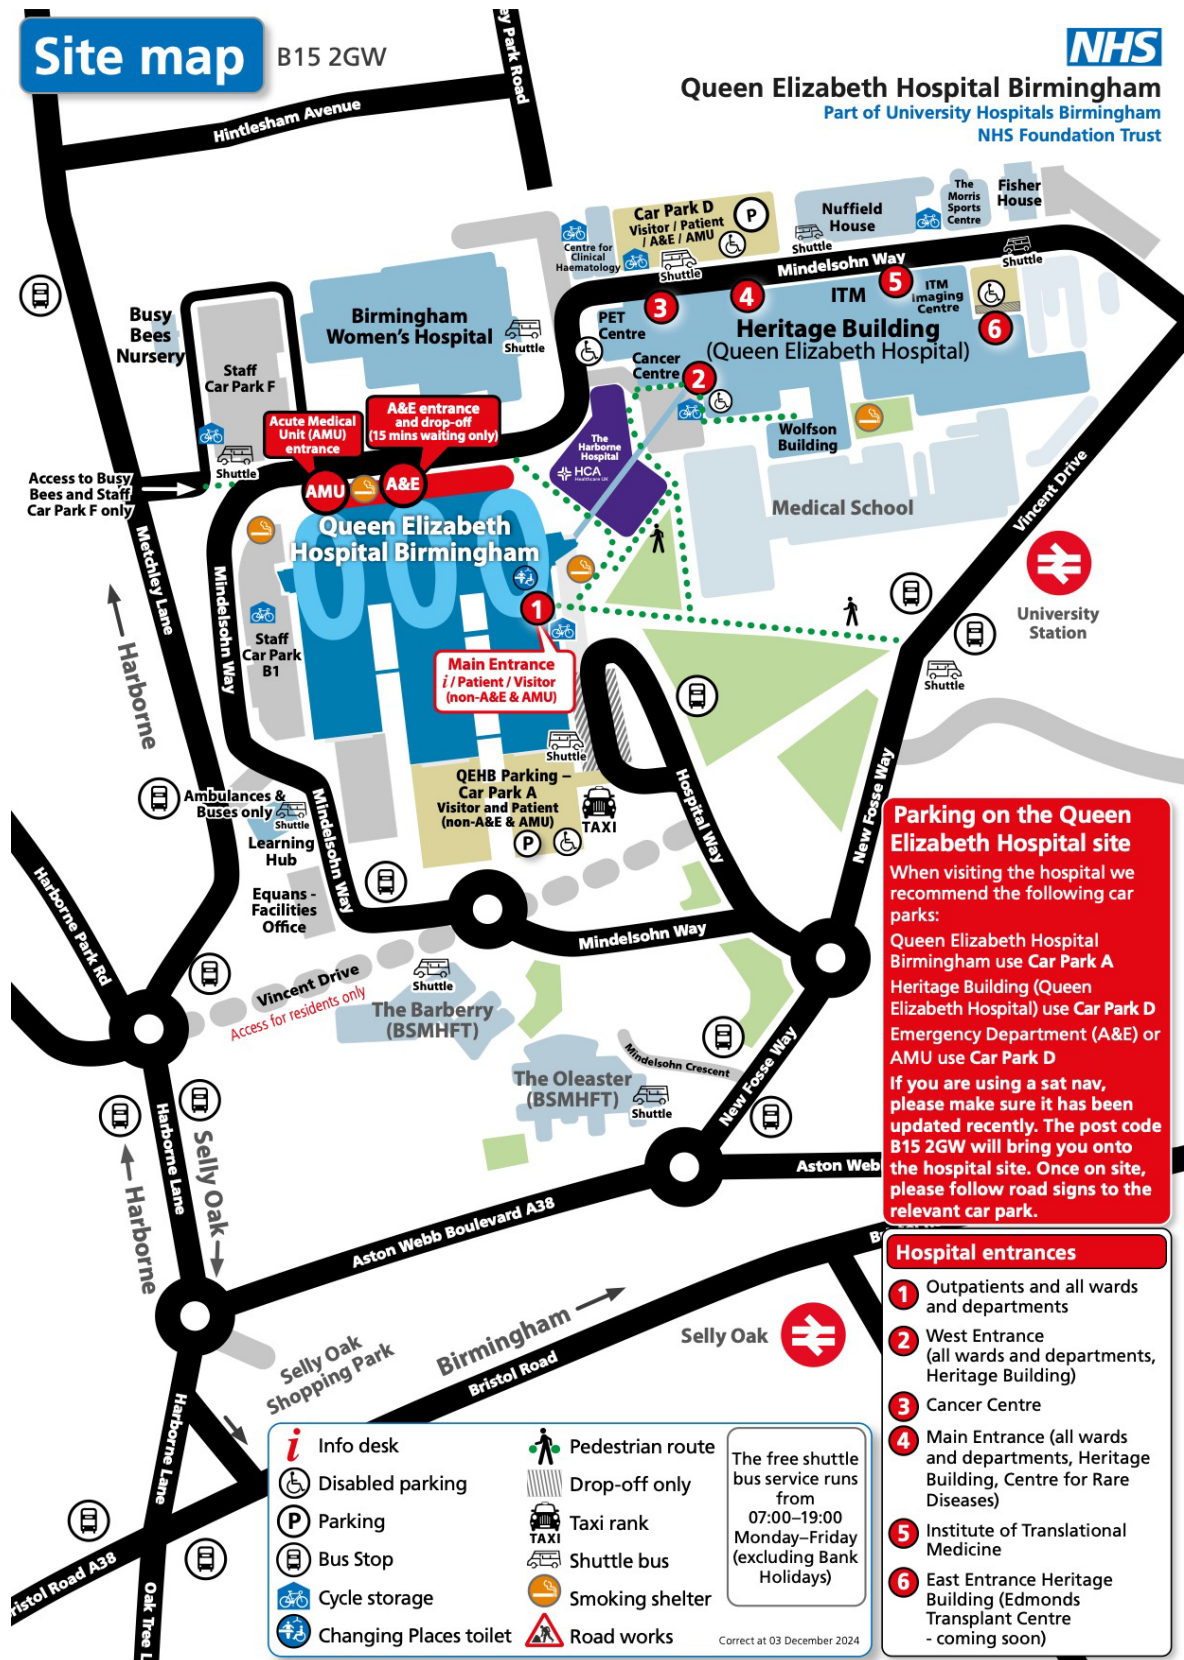

- PALS offer impartial advice and assistance to patients, their relatives, friends and carers. We can listen to feedback (positive and negative), answer questions and help resolve any concerns about Trust services.
- Please ask a member of staff for directions to the onsite Patient Advice and Liaison Service (PALS) office. PALS can also be contacted on 0121 371 3280, or email pals@uhb.nhs.uk

More Information

- All staff would like to make your visit as pleasant as possible. If you have any concerns or ideas to improve our services, please talk to a member of the team or ask at Reception for a Patient Satisfaction Survey form.
