Burns and Plastics

Outreach/ Hospital@Home Service

Building healthier lives

UHB is a no smoking Trust

Hospital@Home/ Plastic Outreach Service

You may be a patient on the ward who can go home earlier than planned. You may even be a patient in the outpatients department, or Accident and Emergency who has a wound that requires Plastic Surgery input. Or you could be a patient in the community whom we assess and provide clinical support for, aiming to prevent your admission to hospital.

The team of specialist nurses will provide clinical care, support and education to patients, carers and colleagues in the community.

We provide a link between the community teams and the hospital to ensure that your specialist treatment continues to be of the highest standard to assist with your recovery.

The 'Outreach' aspect of the service is to provide specialist nursing care for Plastic Surgery or Burn Injured patient's whilst in hospital, or clinic areas.

The aim of the Hospital@ Home/Plastic Outreach Service

- Promoting early discharge from hospital
- Provide support
- Prevention of admission to hospital
- Fast track patients into hospital if needed
- Actively involve patients with their own care
- Promoting independence
- Involve and inform carers
- Provide support and named contacts for the community teams
