

Fertility Investigations – Blood Tests

Follicle Stimulating Hormone, Luteinising Hormone and Prolactin

These are blood tests, which measure hormone levels that are produced by the pituitary gland (situated in the brain).

On day 3 of your cycle (day 1 is the first day of your period) please attend either Good Hope Treatment Centre, Heartlands Outpatients or Solihull Outpatients.

If day 3 falls on a Saturday or Sunday, please attend on the following Monday.

Progesterone – Mid Luteal Phase

This is a blood test to measure hormone levels to identify if you have ovulated.

On **day** of your cycle (day 1 is the first day of your period) please attend either Good Hope Treatment Centre, Heartlands Outpatients or Solihull Outpatients.

If the day of the test falls on a Saturday, please attend on the Friday if the test falls on a Sunday, please attend on the Monday.
