## Blood testing saves patient

A 71-year-old patient has spoken of her gratitude after a routine blood test at Queen Elizabeth Hospital Birmingham's emergency department (ED) picked up that she had hepatitis B.

Renuka Chandan went to the ED for suspected gallstones, but found herself with an early diagnosis of hepatitis B because of a new routine opt-out blood testing programme.

A follow-up confirmatory blood test was then carried out and Renuka was placed in the care of follow-up services at Heartlands Hospital.

Renuka, pictured above right with Nikita Salmon, Liver Specialist Nurse, said: "I am thankful that the NHS have started this programme and that I got picked up through it. I'm fortunate that I have good results and it's not that serious."

"If it hadn't been picked up then it could have been much worse. It's good to know and by being tested you are not only helping yourself, but you are also helping other people and hence the wider community and I think that's very important."

This initiative was started at QEHB last September and in March was expanded to the emergency departments at Heartlands and Good Hope hospitals.

All patients aged 16 and over, who visit the emergency departments, will now be routinely tested for HIV, hepatitis B, and hepatitis C, if they are already having a blood test.

The successful introduction of this approach in 64 emergency departments nationwide, has seen over 7,300 people being newly diagnosed with one of these blood borne viruses (BBV) who were previously unaware.

Since the implementation of this opt-out testing at QEHB last September, over 22,500 blood-borne virus tests have been conducted and have resulted in 36 new BBV diagnoses.

Dr Steve Taylor, Lead HIV Consultant at Birmingham Heartlands Hospital and Clinical Director for the Birmingham Fast Track Cities' initiative, said: "This initiative will be a transformative development for our city and the entire country."

"Early diagnosis of HIV, hepatitis B, and hepatitis C is vital, as these infections can remain asymptomatic for years, potentially causing substantial damage before any signs appear. Our current medications are lifesaving for HIV and hepatitis B, and we can even cure hepatitis C."

# Patient's gratitude to skilful surgeons

For one member of staff at University Hospitals Birmingham, the recent ratings-busting television programme, 'Surgeons: A Matter of Life or Death', was a very emotional watch.

Ten years ago, Tina Rushton, Catering Assistant, had life-changing neurosurgery at Queen Elizabeth Hospital Birmingham (QEHB).

The documentary series, which was filmed at QEHB, reminded Tina of her own 'miracle' surgery and the decade it has gifted her.

Already living with pain, fatigue and facial swelling caused by fibrosis dysplasia, Tina was found to have a 5cm tumour within her meninges, the layers of tissue which protect the brain, which left untreated would leave her paralysed.

She went under the knife in 2015, with skilful neurosurgeons carefully removing the tumour via keyhole surgery. Amazingly, Tina was awake and playing with her granddaughter on the ward less than two hours later.

Tina, who lives in Perry Barr, and works at Good Hope Hospital, added: "I am still amazed at how the surgeons can distinguish one layer of brain tissue from another during the operation. Once out of theatre, the doctors called me 'Wonder Woman' as they couldn't believe how quickly I recovered."

"I guess I don't stop and I always try to move forward with life – within 10 months of my operation, I was working at Good Hope Hospital!"

Having her operation proved to be a turning point for Tina, who was a mature student studying forensic science at the University of Wolverhampton at the time.

Tina added: "I wanted to give something back to the NHS, and make a little bit of a difference. In 2016, I saw a catering job advertised and with my previous career as a dinner lady, I thought it was the perfect opportunity for me."

Tina Rushton, Catering Assistant

"I have 40% deficiency down my left side, but I have found ways to compensate and make things work for me."

With three children and two grandchildren, Tina, 57, is always on the go. When she's not working in the coffee shops in the emergency department or the Richard Salt Unit, Tina loves spending time reading, being with her family, and going on sunny holidays.

She continued: "I love my job as it's my way of contributing – even if it's just a coffee and a smile. During the COVID-19 pandemic, I worked on the wards at Good Hope Hospital delivering inpatient meals which was quite a scary experience. Now, I'm back in the café and I enjoy

empathising with our customers; they tell you their problems and you build relationships with them, especially patients and visitors who have been at the hospital a while."

Inspired by 'Surgeons', and with a celebration to mark the ten-year anniversary of her surgery on the horizon, Tina had a message for her surgical team at QEHB: "Thank you from the bottom of my heart for giving me the rest of my life. I had complete confidence in your skills, and I will always be grateful."

The programme, on Channel 5, averaged 1.3million viewers per episode. Its popularity has meant a third series is on the cards.

## Compliments for colleagues

### Good Hope Hospital

"I just wanted to pass on my thanks to your amazing team in the Emergency Department (A&E). My daughter and I attended when her shoulder was dislocated. It was very busy, yet the staff were so lovely and caring, despite the pressures they were under."

### Heartlands Hospital

"I wish to pass on my thanks to nuclear medicine and the MRI department for the amazing care, kindness, empathy and all round great service I received."

### Queen Elizabeth Hospital Birmingham

"I'm recovering from my second surgical procedure at QEHB, under the care of the liver department. Once again I have been so impressed with the service and treatment I've received, from start to finish. You're all amazing."

### Solihull Hospital

"My dad was a patient on Ward 20A following a hip fracture and surgery. The care was fantastic. The doctors, nurses, physiotherapists and healthcare assistants were all so caring."

If you're a patient who has had a positive experience at any of our hospitals, clinics or community care settings, please tell us about it by emailing [compliments@uhb.nhs.uk](mailto:compliments@uhb.nhs.uk)

# Pharmacist takes on prestigious role

The UK's first Consultant Pharmacist in Inherited Metabolic Diseases (IMD). Antonio Ochoa-Ferraro has been appointed by University Hospitals Birmingham.

Antonio started as a specialist pharmacist at UHB in 2017. Since then he has progressed to the role of advanced clinical pharmacist and now holds the prestigious position of consultant pharmacist, marking a significant milestone in the treatment and care of patients with rare metabolic conditions.

Inherited metabolic diseases are a group of genetic disorders that affect the metabolism, often leading to dangerous imbalances of chemicals in the body. If left untreated, IMDs can result in organ damage and disabilities.

Antonio said: "I'm very grateful to be in this position. I have the support of a fantastic team and my managers, who have allowed me to pursue this recognition. At times, they had to push me to keep going, but their encouragement has been essential in helping me reach this point."

The role is not confined to UHB alone; it has national and regional responsibility. Antonio's role involves working independently within the team to see patients and help manage their medications while also taking on a crucial research and advisory role. He is involved in

developing national guidelines and commissioning policies, collaborating with other metabolic centres, and contributing to both clinical and research projects.

Although the role of consultant pharmacist was established in 2005, it remains relatively rare, and Antonio is only the fifth pharmacist to be accredited in Birmingham.

As part of UHB's metabolic services, Antonio and his team manage a national patient cohort, with some patients coming from as far as Cornwall.

For certain conditions, like Alstrom Syndrome (a rare genetic disorder), UHB serves as the national centre, making it a critical hub for the treatment of patients with these ultra-rare conditions.

Antonio's role includes coordinating care for these patients, ensuring that healthcare professionals across the country understand how to manage these rare diseases and provide reassurance to patients and families.

"Although patients may be treated in their local hospitals, we help coordinate care and educate healthcare providers on these rare conditions. It's reassuring for patients to know that they are not only receiving the care they need but that it's being managed by experts across the country who are dedicated to improving their lives."

Antonio Ochoa-Ferraro,  
Consultant Clinical Pharmacist -  
Inherited Metabolic Disorders

## Centre to offer specialist pregnancy care

University Hospitals Birmingham has been named a regional centre for placenta accreta spectrum (PAS), in partnership with Birmingham Women's and Children's NHS Foundation Trust.

PAS covers a range of rare pregnancy conditions where the placenta grows too deeply into the wall of the uterus. This makes it difficult for the placenta to separate from the uterine wall and be delivered, which can

lead to potentially life-threatening vaginal bleeding.

Between one in 200 and one in 2,000 pregnancies will be affected by PAS.

By becoming a regional centre, UHB will offer centralised specialist care, bringing together dedicated multi-disciplinary teams, specialist skills and equipment which will lead to better outcomes for women and their babies.

UHB's PAS service has been in place since 2015 and has seen over 60 patients. The team has also published their work in reputed journals and shared their experiences at several national and international meetings.

Irshad Ahmed, Lead Consultant Obstetrician, said: "As a regional centre, we are privileged to play a vital role in the comprehensive care and management of PAS, a complex and potentially life-threatening condition. By offering early detection, individualized treatment plans, and a dedicated multidisciplinary team, we not only improve survival rates but also enhance the quality of life for these patients."

Pallavi Karkhanis, Clinical Lead for Fetal Medicine, said: "The ability to provide accessible care within Birmingham allows us to guide women through one of the most challenging experiences of their lives, ensuring their safety and supporting their recovery every step of the way."

Pallavi Karkhanis and Irshad Ahmed

# Research team's recruitment success

A research team at Queen Elizabeth Hospital Birmingham (QEHB) has been recognised for its outstanding achievement in becoming one of the top recruiting sites for a major national trial.

The team has successfully recruited over 100 patients into the FLO-ELA (FLuid Optimisation in Emergency LAparotomy) trial. This is investigating whether cardiac output-guided haemodynamic therapy during and after emergency bowel surgery can reduce mortality rates compared to standard care.

Cardiac output-guided haemodynamic therapy is a medical approach used to optimise a patient's cardiovascular health during critical care. It involves monitoring and adjusting the flow of blood (cardiac output) to ensure that it meets the body's needs, improving overall recovery.

Launched in 2017, the FLO-ELA trial is the largest of its kind and has recruited over 3,000 patients across more than 50 hospitals. It is hoped that the findings will pave the way for improved patient outcomes on a national scale.

At QEHB, the trial has been led by Dr Rajneesh Sachdeva, with support from a dedicated team, including research nurses, practitioners, anaesthetic consultants and registrars, junior specialist doctors, facilitators,

Left to right: Nithya Padmanapan, Junior Specialist Doctor (Standard) in Critical Care; Kadambari (Kady) Tyagi, Doctor, Emergency Department; Colin Bergin, Senior Research Nurse; Hazel Smith, Portfolio Manager: REACT (Research in Emergency and Acute Care Team) and Dr Rajneesh Sachdeva, Consultant Anaesthetist

the emergency theatre team – particularly Theatre 17, recovery, and clinical departments such as surgery, anaesthesia, and critical care.

The trial has been funded by the National Institute for Health Research Health Technology Assessment Programme and sponsored by University Hospital Southampton NHS Foundation Trust.

Dr Mark Edwards, Consultant in Anaesthesia and Perioperative Medicine University Hospital Southampton NHS Foundation Trust and Chief Investigator of the FLO-ELA trial, said: "The team at QEHB has made a highly significant contribution to research in a challenging clinical setting and stands out at a national level in this respect."

Jo Plumb, Director of Research, Development and Innovation at UHB, said: "A huge well

done to Dr Rajneesh Sachdeva and the team for achieving this remarkable recruitment milestone as one of the top recruiting sites for this important NIHR-funded trial. On behalf of the department, many thanks for all your hard work. We are incredibly proud of your contributions, which are making a significant impact in improving patient care and outcomes on a national scale."

Dr Rajneesh Sachdeva, Consultant Anaesthetist at QEHB, added: "It has been a team effort and speaks of the commitment of the research department, emergency theatre and recovery staff, anaesthetic colleagues, registrars, and junior specialist doctors towards research at QEHB. I am thankful to all involved for their support in achieving this milestone."

Amit Ghose

## Spotlight on genetic condition

A documentary – which features an amazing patient story and highlights the work of colleagues at Queen Elizabeth Hospital Birmingham (QEHB) – is now available on the Discovery channel.

It features Amit Ghose, who was diagnosed with a rare genetic condition called neurofibromatosis type 1 (NF1) at the age of two.

Amit has received treatment at QEHB since he was a little boy, and had lifechanging surgery at QEHB at the age of 11.

The documentary highlights the work of the QEHB maxillofacial team, as Amit attended an appointment to receive a new prosthetic eye.

Since filming the documentary, Amit has started working at UHB as Diversity, Equity and Inclusion Business Partner, based at QEHB.

📺 The series which looks at rare conditions, is available to watch for free on Discovery+ under Body Bizarre – Season 8, Episode 3

I am thankful to all involved for their support in achieving this milestone."

**Dr Rajneesh Sachdeva**  
Consultant Anaesthetist at QEHB

# New era for plasma donation

An important milestone has been met with plasma medicines made with donations from UK blood and plasma donors now being used to treat patients across the NHS.

It is 25 years since this service was last offered. Since 2022, NHS Blood and Transplant has been collecting plasma to be made into medicines from donors in England, with contributions from our dedicated donor centres including Birmingham, as well as from whole blood donations.

A spokesperson for the National Blood and Transplant service said: "Thanks to the unwavering support of donors and partners, these life-saving treatments are now a reality."

Plasma-derived medicines, such as immunoglobulin and albumin, play a crucial role in treating people with immune deficiencies, rare

diseases, and critical conditions, including trauma, complications in childbirth, and liver disease.

Until now, the UK has been entirely reliant on imported plasma medicines, mostly from the US, following a ban in 1998 due to Variant Creutzfeldt-Jakob disease. With the lifting of these restrictions in 2021 and 2023, the service have been working tirelessly with NHS England to establish a UK-based plasma medicine supply chain in partnership with appointed fractionator, Octapharma.

This breakthrough means that now plasma-derived medicines made from UK-sourced plasma

will come from English donations, with Scotland expected to join soon, followed by Wales and Northern Ireland. This marks a new era for UK healthcare, increasing the security of supply and reducing reliance on imports.

Thank you blood and plasma donors for making lifesaving plasma medicines

Save lives Give plasma

## Royal honour for Strictly star

Strictly Come Dancing star Amy Dowden was presented with her MBE by His Majesty The King. It was awarded for services to fundraising and raising awareness of inflammatory bowel disease.

Amy has been a chemotherapy patient at Good Hope Hospital since receiving a diagnosis of breast cancer.

Last year, our hospital and its amazing staff, featured in her documentary, 'Strictly Amy: Cancer and Me', which is still available to watch on the BBC iPlayer.

 University Hospitals Birmingham Charity

**Sign up to our weekly lottery and be in with a chance of winning £1,000!**

Your hospital charity runs a weekly lottery and for just £1 a week you could be in with a chance of winning the £1,000 jackpot as well as other cash prizes. Since launching the hospital charity lottery over three years ago, it has given over £230,000 in cash prizes to its amazing supporters.

The money raised from the lottery helps the charity fund cutting-edge equipment and facilities, groundbreaking research and added extras to help our patients, their families, and staff across our four hospitals. You may have already seen some of the vital work the charity funds and how important it is that your local hospital charity continues to raise as much as it can to help those being treated and working on our wards and departments.

The hospital charity also holds two Bumper Lottery Draws each year, which gives its wonderful supporters the chance to win an extra special cash prize. If you sign up to the hospital charity's weekly lottery, you will be automatically entered into the Bumper Draws.

**This year's Summer Bumper Draw is taking place on Friday 18th July, with a jackpot prize of £3,000 thanks to Home Instead.**

You can sign up to our weekly lottery here: [hospitalcharity.org/lottery](https://hospitalcharity.org/lottery) or scan the QR code.

# Bringing joy to our young patients

Being in hospital can be a scary time for adults, let alone children. This is why we want to make the experience as stress free as possible for our young patients, as well as their family and the staff treating them.

We have been busy refurbishing our children's outpatients play area at Heartlands Hospital. It means children visiting the department for appointments have a safe place to play while they wait, distracting them and helping to keep parents calm. It also allows staff to engage with their patients through play.

We have recently completed refurbishments to the Paediatric Physiotherapy Department at Good Hope Hospital, so that children can feel

comfortable in a bright and engaging space during their appointments.

These refurbishments were possible thanks to kind donations to our Children's Appeal, which we re-launched last year. The goal was to help transform more of our children's outpatient departments into welcoming environments for the young patients who visit every year, during what can be a daunting time, with lots of repeat appointments.

The next step of our Children's Appeal is to build a new play area for the Paediatric Physiotherapy and Occupational Therapy Team at Heartlands Hospital, which will be designed to help staff assess their young patients' needs and improve their development.

**To find out more about our Children's Appeal and how you can help us support our young patients, scan the QR code or visit: [hospitalcharity.org/appeals/children-and-young-people](https://hospitalcharity.org/appeals/children-and-young-people)**

## Reach for the sky

Come and join the hospital charity for some truly exciting experiences and help raise vital funds for a ward or department at your local hospital or an appeal close to your heart.

**After the success of our charity abseil at Good Hope Hospital in 2024, this year we have two abseil events - Heartlands Treatment Centre on the 10 May and No3 Brindleyplace on the 20 September.**

Staff from across our hospitals took part last year including Patrick Watson, who dressed up as Tigger, while taking on the challenge for Heartlands Hospital, alongside members of the paediatric team, who raised over £1,000 to help us provide support for young patients and their families.

Suzanne Walsh from Good Hope Hospital also took part, raising over £1,000 to go

towards funding Cancer Cloud Kits to help patients explain their situation in a more child-friendly way to the younger members of their family.

Tammy Mold, a Registered Nursing Associate on the Enhanced Peri-Operative Care (EPOC) Unit at Solihull Hospital took on our charity abseil, raising £325 for her unit to help make her patients' time in hospital as comfortable as possible. Tammy said, "Our patients are the sickest in the hospital and I wanted to raise money to fund items such as radios to help distract them during their treatment."

To sign up to one of the charity's abseils, scan the QR code or visit: [hospitalcharity.org/events](https://hospitalcharity.org/events)

**We also have the ultimate daredevil thrill – the tandem skydive. If you'd like to take on this adrenaline rush – sign up today for one of our Skydives on 7 June or 30 August by visiting: [hospitalcharity.org/products/charity-skydive](https://hospitalcharity.org/products/charity-skydive) or scan the Events QR code. Can't make those skydive dates? Not to worry, we can book a group of you on another day – just email us at [charities@uhb.nhs.uk](mailto:charities@uhb.nhs.uk)**

## A big thank you to special superheroes

This month incredible fundraisers are taking on one of the most famous running events in the world, the London Marathon, to support QEHB Charity.

The trio are each fundraising for a cause close to their hearts. One is raising money to support the Maxillofacial Department which helps patients going through reconstructive

surgery at Queen Elizabeth Hospital Birmingham and another is supporting transplant patients being treated at the new Edmonds Transplant Centre Birmingham, which opens this spring.

Jake Hayden-Wright, pictured left, a Property and Land Manager at QEHB, has been inspired to run the marathon to help fund projects that benefit patients undergoing or recovering from treatment as well as supporting their families. If you would like to help Jake reach his goal, follow: [2025tcslondonmarathon.enthouse.com/pf/jake-hayden-wright](https://2025tcslondonmarathon.enthouse.com/pf/jake-hayden-wright)

Taking on any challenge to fundraise is incredible, especially one as big as the London

Marathon. Every penny raised by taking on challenges such as this, have a huge impact, like funding cutting-edge equipment, life-saving research, renovations to help patients have an easier time in hospital, or activities to help patients' wellbeing.

If you are inspired by these fabulous fundraisers, follow the link to find out about our events and challenges this year:

**[hospitalcharity.org/events](https://hospitalcharity.org/events) or scan the QR Code.**

# Students given insight into healthcare science

Young people were given an insight into the opportunities for a career in the NHS at a fantastic community event to celebrate Healthcare Science Week.

UHB healthcare science colleagues took part in the event at Birmingham ThinkTank, in collaboration with NHS Birmingham and Solihull Integrated Care Board and the National School of Healthcare Science.

Students from across the region were able to learn about the variety of exciting healthcare science roles available at UHB. They visited each team and took part in interactive demonstrations of the work of different teams. The students also took part in a quiz to show their learning at the end of the event and received certificates.

Rachel Webster, Trust Lead Scientist – Life Sciences at University Hospitals Birmingham, said: “It was absolutely fantastic to see so many schools and colleges bring their students to our engagement day, and it was wonderful to see them all engaging with our scientists.”

Debra Balderson, Deputy Director of Education – Healthcare Science Education and Workforce at University Hospitals Birmingham, said: “I really want to thank Stephanie Parkes and her team from Healthcare Careers, we wouldn’t have been able to do this without their support. I also want to thank Birmingham and Solihull Integrated Care Board for their support with funding the event.”

One of the students said: “It’s been a great experience to see all the showcases from the different departments of healthcare sciences, and to see the range and diversity it can offer.”

The team will be continuing to raise awareness of healthcare science career pathways to students, and spotlighting all the fantastic work they do for patients.

Debra Balderson, Deputy Director of Education-Healthcare Science Education and Workforce, Rachel Webster, Trust Lead Scientist – Life Sciences and Stuart Green, Director of Medical Physics at University Hospitals Birmingham

Physiological Science team

## Rosa Sanchez Panchuelo

Rosa Sanchez Panchuelo, a talented and inspirational clinical scientist who had worked for UHB since 2021, has died at the age of 43.

Rosa’s most recent role was as a principal clinical scientist in the MRI Physics Group, based at the Radiation Physics and Protection Service (RRPPS).

She provided scientific support for clinical MRI services and research at UHB, Birmingham Children’s Hospital and in the wider region through the West Midlands Imaging Network.

Rosa was an incredible person, with great energy and passion. She will be deeply missed by her friends and colleagues.

She was bravely fighting stage 4 cancer for several years and died on 13 February at the age of 43.

Despite what she was going through, she was determined to continue working and was always cheerful and kind, only thinking of others and how she could help the team and this was a huge inspiration to all her colleagues.

She was a very talented clinical scientist who refused to let cancer stop her making huge contributions to the improvement of clinical MRI services in many hospitals across Birmingham, the West Midlands region and beyond.

Among many other achievements while battling cancer, Rosa was closely involved in

regional and national groups working on recommendations and providing scientific and practical support for the implementation of MR advanced acceleration technology.

She also led the analysis and write up of an important in the pre-surgical evaluation of patients with temporal lobe epilepsy.

## Team recognition for digital tech

University Hospitals Birmingham has been shortlisted in two categories for a prestigious national awards.

The HSJ Digital Awards 2025 celebrate the outstanding contributions of NHS teams and projects in transforming healthcare through digital technology.

UHB’s nominations underscore our dedication to enhancing patient care and operational efficiency.

The categories in which UHB has been shortlisted are:

- 🏆 **Digital leader of the year award**, which recognises exceptional leadership, vision, and dedication to advancing digital healthcare.
- 🏆 **Improving urgent and emergency care through digital**, which recognises projects that have digitally enabled a 24/7 integrated urgent and emergency care service.

Under the leadership of Professor Tanya Pankhurst, Director of Digital Healthcare at UHB, UHB has achieved remarkable milestones in digital healthcare. Some notable achievements include:

- 🏆 **Development of the electronic health record system**
- 🏆 **Patient portal MyHealth@UHB**
- 🏆 **Grant funding success**
- 🏆 **Clinical leadership and collaboration**

The winners will be announced at the awards ceremony on June 26, at the ICC in Birmingham.

## Networking event

On Wednesday 16 April, the Human Biomaterials Resource Centre (HBRC) Team will be hosting a networking event for staff in Lecture Theatre 3, at Queen Elizabeth Hospital Birmingham.

You can drop in anytime between 12:00–13:00 to meet the team, including Gareth Bicknell, HBRC General Manager, and HBRC clinical coordinators.

You will be able to find out more about the services the team offer, including their pathways and applications process, and network with other researchers and clinicians. This event is for all clinical staff who have an interest in research.

The HBRC, a Human Tissue Authority (HTA) licensed facility operated by UHB, offers a service for the collection, storage, and distribution of human samples (including fresh and frozen tissue and bodily fluids) and data.

The centre is approved to collect samples from NHS trusts across the West Midlands, including UHB.

# Our latest awards

We are delighted to announce that across the teams won a Kind, Connected and Bold award. Congratulations to all of our winners:

## HEARTLANDS HOSPITAL

**Shaun Fitzpatrick**  
Flow Coordinator, Ward 23,  
Acute Medicine and Short Stay

For Shaun's compassionate and empathetic nature and for going above and beyond. Shaun does tasks over and above to maintain patient flow and enhance patient experience. He is dedicated and shows pride in his work.

**Steffan Howell-Smith**  
Charge Nurse, Outpatients,  
Ear, Nose and Throat

For Steffan's dedication to providing the best care for patients. Steffan is a great communicator, team player and problem solver. He has encouraged colleagues to gain extra skills to further their development through university courses.

**Ward 29**  
Healthcare of Older People

Nominated by a patient's relative, who said: "Everyone on this ward is outstanding and the staff go above and beyond. The nurses kept my family well informed, and nothing was too much trouble."

**Dr Kavitha Sooriyakumar**  
Doctor, Immunology

Nominated by a patient, who said: "Dr Sooriyakumar was really kind throughout my procedure. She understood my concerns and answered my questions. My experience was positive throughout."

**Anthony Richardson**  
Porter, Facilities

For going out of his way on Christmas Day to visit his ward and give patients presents and cards dressed as Father Christmas. Anthony made a huge difference to our patients' day. He is kind, patient and respectful.

**Cameron Mitchell-Barnes**  
Lead Specialist Radiographer, Radiology  
and Medical Physics

Nominated by a colleague, who said: "Cameron used to be a physics teacher and has kindly put on Q&A sessions for our apprentice radiography assistant practitioners. He received feedback from one of the apprentices, who said: "Nothing was too much trouble."

## QUEEN ELIZABETH HOSPITAL

**Giovanna Cella**  
Staff Nurse, Critical Care

For her support of a distressed family. Giovanna helped the family and her medical colleagues by translating two very difficult and lengthy conversations. Giovanna undertook this with professionalism, compassion and great skill.

**Sharonjeet Sandhu**  
Clinical Nurse Specialist, Dermatology

For Sharon's exceptional work in establishing the biologics clinic in the hospital's dermatology department. Sharon demonstrated clinical expertise and showed remarkable organisational skills, leadership and a deep commitment to improving patient care.

**Dr Raja Azhar Iqbal**  
Consultant, Emergency Medicine

For conducting communication skills and leadership workshops for International Training Fellows (ITF). Over the past three years, Dr Iqbal has consistently gone above and beyond in supporting ITFs transitioning to the UK.

**Carl Sadler**  
Matron, Theatres

Nominated by a colleague, who said: "Carl has been a constant and unwavering source of support to me during the past few years. Nothing is ever too much trouble for Carl, he is always willing to help, whether that's a face-to-face meet up, an email catch up or a call."

**Natalie Banks**  
Phlebotomist, General Surgery

Nominated, by a colleague, who said: "Natalie was observed by the Observations in Care Team. The feedback we received was that she showed and provided care in a warm and caring manner. Natalie shared interesting conversations that brought a smile to her patients' faces and was seen offering to help colleagues, which creates a great team atmosphere."

**Malgorzata Kowalczyk**  
Ward Manager, Oncology

For Malgorzata's hard work in her role. Malgorzata has kept the team morale high and supports her colleagues daily, nothing is ever too much trouble. She has implemented changes to promote staff wellbeing and improve patient experience.

## Burns Unit

Nominated by a patient, who said: "Whenever I am a patient at Queen Elizabeth Hospital Birmingham, I am sure I will receive the best and kindest care. During my recent week in the Burns Unit, the care I received from all the staff was exceptional."

## GOOD HOPE HOSPITAL

**Lee Everett** <sup>A</sup>  
General Manager, Diabetes,  
Endocrinology, Respiratory, Cardiology,  
Outpatients and Phlebotomy

For Lee's exceptional hard work to enable the successful opening of the Urgent Treatment Centre (UTC). Lee led the facilitation of the UTC and resolved multiple hurdles and barriers efficiently to keep progress on track.

**Stephanie Lynch**  
Matron, Healthcare for Older People

For Stephanie's incredible management skills. Stephanie improved the standard and quality of care in the Healthcare for Older People wards. She supports colleagues and leads her team by example.

**Wayne Hadley**  
Porter, Facilities

Nominated by a colleague, who said: "Wayne is extremely helpful, and he goes above and beyond in his daily duties. He is proactive when he notices something needs to be done and supports busy colleagues. He is always so positive and spends time talking to patients and their families."

# and winners

## e Trust, 29 individuals and d in January.

Do you know a member of our staff or a team, who has gone above and beyond? Nominate them today by:

Filling in our online form by scanning the QR code below, or emailing: [awards@uhb.nhs.uk](mailto:awards@uhb.nhs.uk)

**Top tip:** Nominations are judged on quality rather than quantity, so please provide as much detail as possible about why the team or individual has made a difference and deserves recognition.

### Kirsty Robinson <sup>B</sup>

Administrator, Therapy Complex  
Discharge Team, Therapy Services

For consistently going above and beyond to provide exceptional care and service.

Kirsty learns new skills quickly and is always willing to help her colleagues. She is professional and respectful to her colleagues and patients.

### SOLIHULL HOSPITAL

### Housekeeping Team <sup>C</sup> Facilities

For going above and beyond to make sure the Surgical Elective Hub opened on time for our first patient to be treated. The team had great camaraderie working with estates and contractors to make sure the theatres were spotless and ready to receive patients.

### Nursing Team, Outpatients Department <sup>D</sup>

Nominated by a colleague, who said: "I want to express my appreciation for the professionalism and teamwork by the outpatients department, despite having a heavily booked clinic."

### Emma Storer <sup>E</sup> Biologics Administrator, Rheumatology

For Emma's dedication to patients and the service. Emma has streamlined the biologics service and worked hard to reduce the backlog from over a year down to one month. Emma also supported an elderly patient who was unsteady on his feet by going out of her way.

### COMMUNITY

### Elmdon Unit <sup>F</sup>

Solihull Community Services

For the team consistently going above and beyond. The team works very hard and demonstrates exceptional teamwork.

They are very knowledgeable about best practice in care and treat patients extremely well. The team goes the extra mile, are reliable, punctual and sincere.

### CORPORATE

### Ann Harper Deputy Site Manager, Clinical Site Team, Queen Elizabeth Hospital

For Ann's kindness and compassionate nature. Her positivity has been reassuring to colleagues, especially junior nurses who may be struggling with difficult situations. Ann is humble, reliable and extremely supportive to both colleagues and patients.

### Ashley Davies Medical Equipment Coordinator

### Emma Rabicano Medical Equipment Team Leader, Equipment Library, Good Hope Hospital

Nominated by a colleague, who said: "Ashley and Emma went above and beyond to help facilitate an end-of-life patient on Ward 11 to get discharged home as his final wish. The patient and his wife were brought to tears knowing he could be discharged that day, and he was able to see his grandchildren at home."

### Sue Wintle Operational Lead Process Design, Estates

### Julie Gilmartin

Senior Practitioner, Theatres, Solihull  
Hospital and Community Services

For working tirelessly in planning and organising the pathway for the Surgical Elective Hub services, which included the reconfiguration and relocation of numerous areas and departments within Solihull Hospital.

### Daniel Ghorbani Security Officer, Security, Heartlands Hospital

Nominated by a colleague, who said: "There was a long queue of patients waiting to speak to the navigating nurse in the Emergency Department ambulatory area. Daniel saw a patient who looked unwell and asked him to leave the queue and come straight in, where he accompanied the patient, who was having a heart attack and was taken for a lifesaving procedure. Thanks to Daniel's bold decision and actions, he potentially saved the patient's life."

### RESEARCH AND DEVELOPMENT

### FLO-ELA Trial Research Team, Queen Elizabeth Hospital <sup>G</sup>

For the team leading the recruitment site for the 'Fluid Optimisation in Emergency Laparotomy' trial. The team has recruited over 100 patients in this important trial. They have raised the profile of the hospital as a research leader.

### The Generation Study Team, Heartlands Hospital

For the team taking on the challenge to recruit a generation of babies to a study that identifies rare genetic conditions. The team has also shown incredible kindness to a family in a distressing and unexpected situation.

### WOMEN'S AND CHILDREN'S

### Cathy Wogan <sup>H</sup> Paediatric Respiratory Nurse Specialist, Paediatrics, Heartlands Hospital

Nominated by a colleague, who said: "Cathy is one of the very few people that I can discuss my life openly and honestly with and she will listen, not judge and offer sound advice. Cathy always goes the extra mile, meeting me on the days when she is in clinic, stopping and moving her own life around at the drop of a hat."

### Charlotte Plumpton Maternity Care Assistant, Obstetrics, Heartlands Hospital

Nominated by a colleague, who said: "A patient collapsed in the corridor and Charlotte did not hesitate to make her comfortable. Charlotte reassured her at all times, provided a pillow and considered her dignity."

# Volunteers honoured with awards for long service

Devoted volunteers, who give up their time to help patients visiting our hospitals, have been recognised for their long service.

In February and March, Heartlands, Good Hope and Solihull hospitals each held their annual volunteer long service awards, celebrating the contribution of volunteers make to improving patient experience.

Across the three hospitals, 47 volunteers were recognised for reaching between five- and 35-years' service during 2024.

The first ceremony took place at Heartlands Hospital on 24 February where Lucy Binns, Director of Nursing at Heartlands Hospital, handed out awards to the volunteers, while Emma Hale, Voluntary Services Lead, gave an overview of volunteering.

Lucy described how much the volunteers were valued by the senior leadership team and staff, for the support they provide to patients in our care.

Next up was a celebration event at Solihull Hospital on 27 February when Fiona Wyton, Director of Nursing at Solihull Hospital, handed out the awards and was joined by Andrew Clements, Director of Operations and Dr Pratima Gupta, Medical Director. Fiona thanked the volunteers for their continued support and explained how important their views were in shaping services at Solihull Hospital.

The next event took place at Good Hope Hospital on 3 March with Lynn Fisher, Director of Nursing at Good Hope Hospital, opening proceedings.

Lynn spoke of the importance of recognising the volunteers with the awards and the commitment they give to their local hospital.

At the end of each event, UHB Charities provided tea and cakes, giving the volunteers an opportunity to chat with the senior leadership teams and volunteers.

Emma Hale, Voluntary Services Lead, said: "We are delighted to be able to recognise the dedication of our volunteers in this way."

"We have 414 volunteers at University Hospitals Birmingham who provide invaluable support to patients, carers, and visitors across our hospitals."

"We are privileged that so many of our volunteers enjoy the work they do and continue support us, year after year. They make an invaluable impact on patient experience."

■ Recruitment for new volunteers is always open and an application can be submitted on the UHB website [www.uhb.nhs.uk/get-involved](http://www.uhb.nhs.uk/get-involved) where you can also read about the wide range of volunteer roles available.

■ A similar event was held at Queen Elizabeth Hospital Birmingham at the end of March and will be featured in next month's edition of UHB Connected.

# Consultant's pivotal role in hospital's growth

After an extraordinary career spanning 48 years as a doctor and 20 years of dedicated service at Good Hope Hospital, Dr Masood Qureshi, Consultant in Acute Medicine, is retiring.

Dr Qureshi has been pivotal in building and shaping the hospital's bustling acute medicine service. On joining in 2004, he was one of only two acute medicine consultants. Through his hard work and support, the service has grown to treat around 2,800 patients each month and now boasts a team of 18 consultants. Many of these colleagues were mentored by Dr Qureshi, guiding them throughout their careers.

A graduate of Nishtar Medical College, Pakistan, Dr Qureshi began his medical journey in 1976, earning his Fellowship in Medicine (FCPS) in 1980 and Membership (MRCP) in 1984. Before joining Good Hope Hospital, he spent 24 years as a consultant and professor of medicine in Pakistan. He gained invaluable experience during that time that helped him quickly adapt to his new role in the UK.

Reflecting on his early days at Good Hope Hospital, Dr Qureshi said: "Starting in 2004, acute medicine was a relatively new specialty and was rapidly evolving. There was a lot of work, but it felt rewarding."

Among his many career achievements, Dr Qureshi takes pride in the long-lasting professional relationships he has developed and the opportunities he has had to teach and train aspiring medical professionals. He said: "Teaching medical students and young doctors has always been a deeply satisfying part of my journey. I have had the privilege of working with brilliant, hardworking, and compassionate colleagues who respected and learned from one another. Not working alongside them will be a big change."

As he begins his retirement, Dr Qureshi is excited about spending more time with his family and taking trips to Pakistan to visit loved ones. He hopes to stay connected with his colleagues and to continue contributing to collective memory and group learning.

His colleague, Damian Perrin, Consultant in Acute Medicine, said, "Masood is highly respected by the entire team for his hard work, compassion, and unwavering support for his colleagues. In a high-pressure environment like acute medicine, where thousands of patients are treated each year, Masood's dedication has been truly remarkable."

Teaching medical students and young doctors has always been a deeply satisfying part of my journey."

**Dr Masood Qureshi**

## New software

UHB staff can now easily access Colorveil software on their computers through self-installation. Colorveil helps reduce eye strain and supports individuals with Dyslexia and Scotopic Sensitivity Syndrome (also known as Irlen Syndrome or visual stress).

The software applies a customisable filter to your screen and any active applications, which can be turned on or off at any time. You can also adjust the filter's colour and opacity, making it easier to read and navigate your screen.

To install ColorVeil, simply search for 'Software Self-Service Portal' in your Windows Start menu, where you'll find the option to install it. For instructions on how to do this, search 'ColorVeil user guide' on the Intranet.

## Celebrating Rare Diseases Day

The team from the Rare Diseases Centre at Queen Elizabeth Hospital Birmingham celebrated Rare Diseases Day on 28 February with an awareness stand in the atrium.

The centre, located in the Heritage Building, provides a one-stop service where patients can undergo pre-planned diagnostic tests and see all relevant specialists in a single visit.

Bringing together experts across multiple specialties, the team is committed to developing and implementing pioneering treatments, technologies, and techniques for rare diseases.

Since opening in 2015, the centre has grown to run over 100 different clinics, with more than 1,000 appointments taking place each month, both in person and virtually. Among these is the Bardet-Biedl syndrome (BBS) clinic.

BBS is a rare, genetic disorder, which affects one in 100,000 babies born. Some features include rod-cone dystrophy (a progressive eye disorder that leads to blindness), renal abnormalities, obesity, developmental delay and speech and language difficulties.

To help raise awareness, one of the centre's patients, Aneeba Ahmed, joined the team at the stand to speak with visitors throughout the day. Diagnosed with BBS in infancy, Aneeba, pictured seated above, has been attending the annual BBS clinic at the centre since 2017.

She said: "The care has been fantastic. Not only do I get to see everybody at a one-stop clinic, but I also get support outside of it when the staff give me a call to see how things are going."

The team also marked the occasion with celebrations in the department throughout the day.

## Nurse's dedication to community

Colleagues at Solihull Hospital gathered to say goodbye to Ann White, an Intravenous (IV) Therapy Lead, who is retiring after working in the district nursing service for over 40 years. Ann has been a dedicated throughout her career and has taken on her roles with passion and commitment.

She has witnessed many changes during her long career and has been involved in various improvement and policy plans. Ann has taken on tasks with enthusiasm, always striving for the best outcomes for our patients and teams.

Ursula Hare, Deputy Director of Nursing for Solihull Community Services, said: "We are really sorry to see Ann retire, and we wish her well in the future. Ann has been

a critical part of community services for many years, providing a really essential service to our patients in the community. She has also supported hundreds of colleagues and staff throughout the years, allowing them to develop their skills

under her watchful eye. Ann has really developed the community IV service to the standard that it is today, which all staff and patients benefit from. We will really miss her."

Colleagues said goodbye to Ann White, centre

Ann said: "It has been wonderful working with you all, I will miss you."

Ann will be greatly missed by all her colleagues.

## 'Legend' leaves after 40 years

Much-loved colleague Michelle Duggins has retired after four decades of service to University Hospitals Birmingham (UHB).

Michelle, Capacity Manager for Ambulatory Care at Queen Elizabeth Hospital Birmingham (QEHB), was given a great send-off in March. She had spent 40 years at UHB, having formerly worked at the old Selly Oak Hospital.

A huge number of colleagues posted on the QEHB staff Facebook page wishing Michelle all

the best in her retirement and thanking her for all she has done in her time at UHB.

Colleagues described Michelle as "truly dedicated to her job", "a legend" and an "absolute superstar".

Other comments included: "The hospital won't be the same without you", "you always went above and beyond" and "I will never forget the invaluable advice and support you gave me".

Michelle, centre, pictured at her retirement celebration

## Gym steps up a gear

**Good Hope Hospital's physiotherapy outpatient gym has undergone an exciting and much-needed renovation.**

For years, the gym, which serves as a critical area for teams providing essential services for musculoskeletal (MSK), respiratory, cardiac rehabilitation, and neurological conditions, has remained largely unchanged. Now, with increased demand for physiotherapy services, the refurbishments promise to create a more effective, safer, and welcoming environment for both staff and patients.

The gym plays a vital role including classes for patients recovering from knee

and shoulder injuries, hip replacements, and conditions such as osteoarthritis. However, the space had become dated, so to address these concerns, the renovation includes a complete overhaul of the gym.

Alison Jackson, Therapy Lead for Musculoskeletal and Orthotics at Good Hope and Solihull hospitals, said: "It's brilliant to see a space that looks fresh and professional. It reflects the quality of physiotherapy care we deliver and motivates both staff and patients. We are extremely proud to deliver on the pledge we made to our staff in creating a gym fit for purpose and one that will improve health outcomes for our patients."

Luke Wilkins, Clinical Team Lead at Good Hope Hospital, added: "For patients, a modern, well-equipped gym will offer an environment that fosters rehabilitation success. With an aging population and increased healthcare pressures, the demand for physiotherapy services is growing."

In Birmingham, where public health data indicates that 65.2% of adults are clinically overweight or obese, access to high-quality rehabilitation services is more critical than ever. The renovation of the gym aims to support the hospital's commitment to improving health outcomes and promoting healthier lifestyles through exercise.

Left to right: Mahek Soni, Musculoskeletal (MSK) Physiotherapist, Sam Khan, Therapy Support Worker, Julie Hunter, Hospital Director for Allied Health Professionals (AHP), Alison Jackson, Therapy Lead - MSK and Orthotics and Paul Barker, Consultant Physiotherapist

## Farmers' markets

Pick up fresh goodies at one of our farmers' markets, where a wide range of products are on sale.

All colleagues and the public are invited to support our friendly vendors and discover a delightful selection of nibbles, gifts, and treats.

The farmers' market at **Solihull Hospital** is on the first Wednesday of every month, in the cafe courtyard by the main entrance. The market typically runs from 09:00 to around 14:00, however it may close earlier if vendors sell out or if it's particularly quiet after lunchtime.

At **Good Hope Hospital's** farmers' market, the traders offer a wide range of artisan and hand-crafted goods including cakes, pies, and Indian food as well as clothing and beauty products. Find the market outside the Treatment Centre every third Wednesday of the month, between 07:30–15:00.

There is a great choice of seasonal produce at the farmers' market at **Queen Elizabeth Hospital Birmingham**. The market also supports local businesses as well as social enterprises working with disadvantaged local people. It is held outside the main entrance on the second and last Wednesday of every month, between 08:00–15:00.

## Staff networks

Staff networks are an opportunity for individuals to connect, support one another, and discuss issues relevant to them. All networks are open to all staff who identify with them, or for those who consider themselves allies.

If you'd like to find out more, email [Inclusion@uhb.nhs.uk](mailto:Inclusion@uhb.nhs.uk) or search 'staff networks' on the intranet.

- REACH Staff Network**
